

Chatbot

- A software application or algorithm designed to simulate human-like conversation by processing and generating text-based messages

Model

- `facebook/blenderbot-400M-distill`
- Distilled version of Facebook's BlenderBot model with 400 million parameters.
- Designed to engage in open-domain conversations, meaning it can chat about a wide range of topics rather than being limited to a specific domain

Chatbot

- Simulated with a “while” loop
